# Prediction of Survival in Patients with Heart Failure

## How does it work ❓

Complete all the questions and the machine learning model will predict the survival of patients with heart failure

## These are the values you entered 👦 ⚕️

```
{
  "Age" : 44
  "Sex" : "Male"
  "Anaemia" : "Yes"
  "Creatinine phosphokinase (mcg/L)" : 4000
  "Diabetes" : "Yes"
  "Ejection fraction %" : 40
  "High blood pressure" : "Yes"
  "Platelets (kiloplatelets/mL)" : 48100
  "Serum creatinine (mg/dL)" : 6.29
  "Serum sodium (mEq/L)" : 118
  "Smoking" : "Yes"
  "Time" : 55
```

}

Predict

## Results 👁

The patient will live
